Current Situation: Firefighters are being released as containment grows, allowing them to be reassigned and available for other fires throughout the state. During peak fire conditions throughout the day deep seated pockets of heat have produced several small flare ups within the interior. Overnight cooling with relative humidity recovery is continuing to reduce the threat of fire activity along the perimeter. Access to the fire line continues to be challenging in various parts of the fire. Damage assessment has been completed and firefighters continue to establish and construct containment lines and implement the suppression repair plan. **"RESIDENTS ARE URGED TO STAY VIGILANT AND ADHERE TO ANY CHANGES IN EVACUATIONS AND ROAD CLOSURES"**. Fire activity and direction can change at any time, be prepared and stay informed. With the elevated fire danger, we are asking everyone to use extreme caution, **"Ready, Set, Go"**.
